

EPI GRAND ROUNDS

Session 42

MONDAY, November 16th, 2026

THE ROLE OF AMNIOCENTESIS IN PPROM AND PTL

Objectives:

- To review the scientific evidence supporting the use of amniocentesis to optimize the antenatal management of patients with preterm labor (PTL) and preterm prelabor rupture of membranes (PPROM).
- To discuss our clinical experience and the evidence generated by our research group regarding amniocentesis-based management strategies.

PRESENTED BY DR. TERESA COBO

Dr. Teresa Cobo is coordinator of the BCNatal-FMRC Prematurity Inflammation line. She graduated in Medicine and Surgery (2000) and obtained her PhD (2009) from the University of Barcelona, with a specialty in Gynecology/Obstetrics (2005) and a diploma in Health Sciences Statistics (2016) from the Autonomous University of Barcelona. She was a senior specialist at Sahlgrenska Hospital, Sweden (2012; 2015–2016), specializing in infectious and inflammatory causes of spontaneous preterm birth. She has 60+ international publications and is a PREBIC and CIBERER member and IDIBAPS-accredited researcher. She specializes in preterm birth prediction and management, intra-amniotic infection/inflammation, and leads the Prematurity Unit at Hospital Clínic.

Length: 1 hour

11:00AM PST / 12:00 PM MST / 1:00 PM CST / 2:00 PM EST / 3:00 PM AST / 3:30 PM NST
